- English (Fluent)
- French (Fluent)
- Arabic(Fluent)
- German (Basic)

PROFILE

Moktada Zaidi is a 21-year-old software engineering undergraduate at the Higher Institute of Computer Science of Mahdia in Tunisia. With a strong interest in AI and modern web development, he specializes in building applications using React.js and Supabase. Moktada also brings over two years of experience in graphic design and has worked on multiple personal tech projects. Beyond the tech world, he's been an active scout leader for three years, gaining leadership experience and earning several national and international certifications in both IT and scouting. Passionate, versatile, and community-driven, Moktada continues to grow as a developer and leader.

PROJECTS AND EXPERIENCES

POSTERY E-COMMERCE :

Built a FullStack Posters E-commerce Platform providing login and registration functionalities with an admin Dashboard to track orders . I used NextJs for the frontend , functions and Supabase for the database and the account management

COLOR DETECTION PROJECT:

Built a Python-Based system that allows users to know the colors detected by the camera.It uses the OpenAI API and the Built-In PC camera.

3D MOCKUP-DESIGN WEBSITE:

Built a 3D-Mockup-Design Web Application that allows users to design their preferred T-Shirts with switching from logos to patterns functionality , Also Color Changing , Uploading local png,jpg,jpeg and svg files with an AI chatbot that can generate logos or patterns referring to a prompt typed by the user. I used ReactJs and ThreeJs for the Frontend Animations , the Dynamic UI/UX and 3D modeling .
